# USE CASE DESCRIPTIONS

*HR Appointment Allowance Request Management System*

Portfolio case study | Based on BRD v1.0 and Use-Case-Diagram_Reviewed.drawio | 18 October 2026

Scope note: This is a fictional case study. Eligibility criteria, required evidence, status names, and other policy-dependent decisions remain TBD. Payment calculation and execution are out of scope. Finance handoff is subject to scope approval.

## Traceability and conventions

Each entry corresponds to exactly one use case in the reviewed diagram (UC-01 through UC-13). "System" indicates automated behavior, not an additional actor. Only the two «include» relationships shown in the diagram are documented. Steps are descriptive rather than a newly approved workflow specification.

## UC-01 — Sign in

| | |
|---|---|
| Primary actor | Employee |
| Precondition | Employee seeks to access the service. |
| Goal / outcome | Employee is authenticated through the organization's approved sign-in method. |
| Main flow | 1. Employee initiates sign-in.<br>2. System authenticates the employee using the approved organizational method. |
| Alternative / exception | Authentication does not succeed: the request service is not accessed. |
| Postcondition | An authenticated employee may access the authorized request service. |
| BRD references | BR-08; RULE-01 |

## UC-02 — Create allowance request

| | |
|---|---|
| Primary actor | Employee |
| Precondition | Employee is authenticated and opens the appointment allowance service. |
| Goal / outcome | Employee submits a complete request and receives a unique reference. |
| Main flow | 1. System displays the appointment allowance service and available employee profile information.<br>2. Employee enters request details and provides supporting information/documents where required.<br>3. System performs Validate request data (UC-13).<br>4. On successful validation, employee submits the request.<br>5. System records the submission and assigns a unique request reference. |
| Alternative / exception | If required information is missing or invalid, submission does not proceed; field-level feedback is shown. |
| Postcondition | Request is submitted with a unique reference and recorded status/history. |
| BRD references | BR-01; BR-03; AC-01; AC-02; RULE-02 |

### UC-03 — Track request status

| | |
|---|---|
| Primary actor | Employee |
| Precondition | Employee has a request and authorized access. |
| Goal / outcome | Employee can see the request's current status and key milestones. |
| Main flow | 1. Employee opens request tracking.<br>2. System displays current request status and key milestones. |
| Alternative / exception | None specified in BRD. |
| Postcondition | Current status is visible to the employee. |
| BRD references | BR-02; AC-05 |

### UC-04 — Correct & resubmit

| | |
|---|---|
| Primary actor | Employee |
| Precondition | An HR Specialist has returned the request for information/correction. |
| Goal / outcome | Employee resubmits a corrected request while preserving history. |
| Main flow | 1. Employee opens the returned request and its reason for return.<br>2. Employee corrects or completes the requested information.<br>3. Employee resubmits the request.<br>4. System retains the request history and updated status. |
| Alternative / exception | If the corrected submission is incomplete, required-field validation prevents submission (see UC-13). |
| Postcondition | Corrected request is resubmitted; previous actions remain traceable. |
| BRD references | BR-03; BR-05; AC-02; AC-03 |

### UC-05 — Review request

| | |
|---|---|
| Primary actor | HR Specialist |
| Precondition | A submitted request is available for HR review. |
| Goal / outcome | HR Specialist reviews completeness and eligibility before decision routing. |
| Main flow | 1. HR Specialist opens the submitted request and supporting information.<br>2. HR Specialist reviews completeness.<br>3. Review includes Check eligibility (UC-07).<br>4. HR Specialist routes the reviewed request for authorized decision, or returns it for correction (UC-06). |
| Alternative / exception | Incomplete or unclear information: HR Specialist returns the request for correction with a reason. |
| Postcondition | Request is routed for decision or returned for correction, with action recorded. |
| BRD references | BR-04; AC-03; RULE-03 |

### UC-06 — Return for correction

| | |
|---|---|
| Primary actor | HR Specialist |
| Precondition | HR Specialist is reviewing a request that needs information/correction. |
| Goal / outcome | Employee is asked to correct the request, with a recorded reason. |
| Main flow | 1. HR Specialist selects return for correction.<br>2. HR Specialist records the mandatory reason.<br>3. System updates the request status/history and notifies the relevant employee. |
| Alternative / exception | Return without a reason is not permitted. |

| | |
|---|---|
| Postcondition | Request is returned with its reason recorded. |
| BRD references | BR-04; BR-07; RULE-05; AC-03 |

### UC-07 — Check eligibility

| | |
|---|---|
| Primary actor | HR Specialist |
| Precondition | Request is under HR review; approved policy checklist is available when confirmed. |
| Goal / outcome | Eligibility is assessed against the approved checklist. |
| Main flow | 1. HR Specialist checks request information against the applicable approved policy checklist.<br>2. HR Specialist records the eligibility review outcome as part of the request review. |
| Alternative / exception | Actual criteria or unclear cases: criteria/handling are TBD pending policy-owner confirmation. |
| Postcondition | Eligibility review outcome is available for the review/decision process. |
| BRD references | RULE-03; BR-04 |

### UC-08 — Approve / reject request

| | |
|---|---|
| Primary actor | HR Manager |
| Precondition | Reviewed request is routed to the designated authorized approver. |
| Goal / outcome | Authorized HR Manager records an approval or rejection. |
| Main flow | 1. HR Manager opens the reviewed request and supporting history.<br>2. HR Manager approves or rejects the request.<br>3. For rejection, HR Manager records a reason.<br>4. System records the decision, decision actor/date and request status, and notifies the employee. |
| Alternative / exception | Rejection without a reason is not permitted. |
| Postcondition | Final decision and audit history are recorded; employee is notified. |
| BRD references | BR-04; BR-05; BR-07; RULE-04; RULE-05; AC-04; AC-05 |

### UC-09 — View request history

| | |
|---|---|
| Primary actor | Employee; HR Specialist; HR Manager |
| Precondition | User has authorized access to the relevant request. |
| Goal / outcome | Authorized user can inspect traceable actions and status changes. |
| Main flow | 1. User opens the request history.<br>2. System displays recorded actions and status transitions with actor and timestamp. |
| Alternative / exception | Access is restricted by authorized role; detailed permissions are TBD. |
| Postcondition | Request history is visible to the authorized user. |
| BRD references | BR-05; BR-08; RULE-06; AC-06 |

### UC-10 — Receive notifications

| | |
|---|---|
| Primary actor | Employee; HR Specialist; HR Manager |
| Precondition | A relevant request event or required action occurs. |
| Goal / outcome | Relevant users receive notifications about required actions or outcomes. |
| Main flow | 1. System detects a relevant request event (such as submission, return, approval, or |

| | |
|---|---|
| | rejection).<br>2. System notifies the relevant authorized user. |
| Alternative / exception | Notification channels and delivery failure handling are not specified in BRD (TBD). |
| Postcondition | Relevant notification is issued by the system. |
| BRD references | BR-07; AC-05 |

### UC-11 — Receive approved handoff

| | |
|---|---|
| Primary actor | Finance Officer |
| Precondition | A request is approved; finance handoff has been separately approved as in scope. |
| Goal / outcome | Authorized finance recipient can access approved request details for downstream handling. |
| Main flow | 1. System makes approved request details available to the authorized finance recipient.<br>2. Finance Officer receives/views the approved handoff. |
| Alternative / exception | If finance handoff is not approved as in scope, this use case is not implemented. |
| Postcondition | Approved request details are handed off; no payment calculation or execution occurs in this system. |
| BRD references | Proposed only; not included in BRD v1.0 future-state flow |

### UC-12 — View summary reports

| | |
|---|---|
| Primary actor | HR Manager |
| Precondition | HR Manager has authorized reporting access. |
| Goal / outcome | Manager views aggregate operational reports. |
| Main flow | 1. HR Manager opens summary reporting.<br>2. System displays aggregate request volumes, statuses and processing/turnaround information. |
| Alternative / exception | Specific filters, formats and access rights require confirmation (TBD). |
| Postcondition | Management reporting information is visible to authorized HR Manager. |
| BRD references | BR-06; AC-07 |

### UC-13 — Validate request data

| | |
|---|---|
| Primary actor | System (included by UC-02) |
| Precondition | Employee is entering/submitting an allowance request. |
| Goal / outcome | Mandatory information is validated before HR review. |
| Main flow | 1. System checks mandatory fields and available data-format requirements.<br>2. System identifies missing or invalid values.<br>3. System permits submission only when mandatory validation passes. |
| Alternative / exception | Missing/invalid data: system displays clear field-level feedback and prevents submission. |
| Postcondition | Request passes validation or is held for correction before submission. |
| BRD references | BR-03; RULE-02; AC-02 |

## Open decisions carried forward from BRD

- Actual eligibility criteria and required evidence
- Authorized approval matrix and request statuses
- Return and resubmission rules beyond the documented reason/history requirement
- Duplicate request handling
- Reporting permissions and required formats
- Finance handoff inclusion (not part of BRD v1.0 approved scope)
